

CONVEYING & HOISTING SOLUTIONS RUBBISH CHUTES

Non corroding polymer design available in various thicknesses of plastic and with wear ribs (as shown).

Electroplated attachment brackets with load rated chain make for a safe hook-up.

Rubbish inlets that you can tip a large builder's barrow into, are standard.

RUBBISH CHUTES

CHUTE BENEFITS

- A proven, most cost effective way for you to get waste into a skip bin quickly.
- Use of plastic keeps the system's weight down which gives several options on how to hang the chutes at your worksite.
- Can be installed by us or you can follow instructions and do it yourself
- Up to 40 one metre chutes can be hung from one attachment bracket.
